Subject Index to Volume 24

January	pages 1–146	July	pages 803–990
February	pages 147–264	August	pages 991–1156
March	pages 265–392	September	pages 1157–1332
April	pages 393–526	October	pages 1333–1448
May	pages 527–666	November	pages 1449–1540
June	pages 667–802	December	pages 1541–1666

A

Accommodation
  in binocular vergence, 772
  dark focus, 1528
  hysteresis in, 513
  resting point of, phenylephrine HCl and, 393
  vasoactive intestinal peptide in, 250
Achromatopsia
  congenital, pursuit eye movements on an OKN background, 1115
  X-linked incomplete, 451
Acrylamide
  and cold cataract, 99
Actin
  in normal and dystrophic rat pigment epithelial cells during phagocytosis of rod outer segments, 821
  in pigment granule transport and cone movement, 1
  in retinal pigment epithelium, 803
Acuity
  see Visual acuity
Adenosine monophosphate, cyclic (cAMP)
  dibutyryl, and light-induced photoreceptor shedding, 1328
  in the eye, 527, 1139
  retinal, iodoacetic acid effect on, 1236
  and retinomotor pigment migration in teleost RPE, 16
  synthesis, in water-loaded rabbit, effect of timolol stereoisomers on, 1276
Adenosine triphosphate (ATP)
  in intact cornea, phosphorus-31 NMR study, 535
β-Adrenergic pathway
  in cornea, 1139
    changes in responsiveness, 527
A422-284
  in lens, phosphorescence spectroscopy, 1505
Age
  eyelid tension and, 1367
  and lens leucine aminopeptidase, 1172
  and metabolic production of fluorophor in mouse lens, 1157
  and spherical aberration of rat crystalline lens, 1162
Albumin
  serum, in tear fluid, 623
Aldose reductase
  and galactose-induced retinal capillary basement membrane thickening, 1519
  in human retinal mural cells, 1516
  in retinal and cerebral microvessels and cultured vascular cells, 1250
Aldose reductase inhibitors
  and corneal re-epithelialization in galactosemic rats, 563
  in lens
    fluorescence spectroscopy, 1505
    phosphorescence spectroscopy, 1505
  for prevention of diabetic complications in lens and nerve, 1426
  for reversal of galactose cataract, 640
Alkali injury
  conjunctiva, goblet cell frequency after, 612
  corneal
    oxygen uptake and, 582
    wound healing, 1358
α-Aminoadipate
  retinal effects (chick embryo), 1480
Amacrine cells
  retina
    leucine-enkephalin in, 879
    ^{3}H-GABA uptake, nipecotic acid block of, 886
Amblyopia
  anisometropic, lateral geniculate nucleus in, 788
  binocular visual functions in, occlusion therapy and, 778
  contrast thresholds for sine gratings, 782
  in esotropia and exotropia, 1390
  strabismus and, 496
American Cooperative Cataract Research Group (CCRG)
  classification of human senile cataractous changes, 424
Amino acids
  in cataractogenesis, 106
  zonular, 119
γ-Aminobutyric acid (GABA), in newborn human retina, 893
  retinal uptake, nipecotic acid block of, 886
Amphotericin B
  in *Candida albicans* keratitis, 1098
Angiogenesis
  in corneal inflammation, 1595
Angular aqueous plexus
  of hamster, distribution of ^{35}S-sulfate and ^{3}H-glucosamine in, 697
Aniseikonia
  nonoptical determinants, 507
Anisometropia
  amblyopia in
    contrast thresholds for sine gratings, 782
    lateral geniculate nucleus in, 788
  and aniseikonia, 507
Anomaloscope
  in retinitis pigmentosa, 1123

Anterior chamber
-associated immune deviation, 1339
flare and cells, nitrogen mustard-induced, 175
perfusion, repeated, effect of IOP and total outflow facility in monkey, 159
TNP-modified splenocyte injection
immune response, *see* TNP-ACAID
Antibiotics
intravitreal, pharmacokinetics in monkey, 1602
Antibody
formation, lymphokines and, 361
monoclonal, *see* Monoclonal antibody
Antifungal agents
efficacy in cornea, 1098
Antigen
S, retinal specific, 1333
Anti-inflammatory agents
comparative evaluation, 1143
Aqueous humor
ascorbate, intracarotid mannitol infusion and, 153
coagulation properties, 1616
complement levels in, 380
flow rate, topical dexamethasone effect on, 1307
formation, epinephrine and, thymoxamine effect on, 165
formation of
pilocarpine and, 1269
salbutamol and, 1269
timolol and, 718, 1269
N-formimidoyl thienamide penetration, 1147
hypoxia, in cat, corneal contact lens and, 1052
inflamed, complement levels in, 380
leukocyte accumulation in, systemic injection of bacterial endotoxin and, 196
outflow facility, *see* Outflow facility
trabecular meshwork glutathione and, 1283
precursors of extracellular matrix components, dexamethasone administration and, 704
sulfhydryl reagent perfusion, morphology and function following, 710
protein, intracarotid mannitol infusion and, 153
secondary, and proliferation of cultured corneal endothelial cells, 557
uveoscleral outflow, 1288
Aqueous outflow pathway
glucocorticoid target cells in, 1612
in vitro carbohydrate synthesis, 1546
Arylsulfatase A
deficiency, 991
Ascaris suum
larvae, in vitro eosinophil interaction with, 1346
Ascorbate
aqueous humor, intracarotid mannitol infusion and, 153
in guinea pig retina, 862
Aspartate
in newborn human retina, 893
Association for Research in Vision and Ophthalmology (ARVO)
public affairs, 1445
Asteroid bodies
ultrastructure, 133
Astigmatism
lid tension and, 1367
Autoradiography
distribution of ^{35}S-sulfate and ^{3}H-glucosamine in angular region of hamster, 697
^{3}H-GABA, nipecotic acid block of neuronal GABA accumulation in rabbit retina, 886
glucocorticoid target cells in human outflow pathway, 1612
neurotransmitter properties of newborn retina, 893
ocular glucocorticoid activity, 147
pressure-induced fast axonal transport abnormalities, 343
regional optic nerve blood flow and its autoregulation, 1559
retinal detachment in cat, 906
rhodopsin chromophore exchange, 1211
Axonal transport
see under Optic nerve

B

Background adaptation
b-wave, in RCS rat, 72
Bacterial endotoxin
systemic injection of, ocular inflammation and, 196
Basement membrane
corneal epithelium, age-related changes, 1015
Batten disease, 77
BCNU
and H_2O_2 detoxification by lens, 113
Békésy tracking
for determination of threshold contrast sensitivity, 798
Benzyloxycarbonyl-L-leucyl-hydroxamate (Z-Leu-NHOH)
inhibition of Pseudomonas elastase, 1093
Binocular summation
development of, in human infants, 1103
Binocular vision
binocular neurons and, in monkeys and children, 491
Biomicroscopy
cataract in RCS rat, 654
1,3-Bis(2-chloroethyl)-1-nitrosourea
see BCNU
Bleeding time
effect of aqueous humor on, 1616
Blood coagulation
activity of intraocular humors and CSF, 1616
Blood flow
intraocular, determination of, from analysis of angiograms, 354
iris, in hypoxia and hyperoxia, 741
optic nerve, 1559
retinal, light-dark effects, laser Doppler velocimetry in, 737
Blood vessels
see Vascular system
Blood-aqueous humor barrier
chicken, structural basis, 326
disruption of
capsaicin and, 744
systemic injection of bacterial endotoxin and, 196
modification, intracarotid mannitol infusion and, 153
Blood-ocular barrier
pharmacokinetics interpretation of vitreous fluorophotometry, 1374
Blood-retina barrier
alterations, in streptozotocin-induced hyperglycemia (rat), 1259
horseradish peroxidase study, 1465
permeability of, in phototoxic retinopathy
ultrastructural study, 962
vitreous fluorophotometry and histofluorescence microscopy in, 972
retinal pigment epithelial damage and, 1475
Blue cone monochromacy
in X-linked incomplete achromatopsia, 451
Bruch's membrane
proteoglycans of, 898
Burns
alkali, *see* Alkali injury

C

Calcium
in lens, in x-ray cataract (rabbit), 1188
and photoreceptor disc shedding, 1456
protein synthesis and, in rabbit lens, 1422
Calcium oxalate
in human lens opacities, 1194
Candida albicans
corneal infection, antifungal agents for, 1098
Capillary endothelial cells
retinal, in vitro aldose reductase activity, 1250
Capsaicin
and disruption of blood-aqueous barrier, 744
Carbenicillin
intravitreal, pharmacokinetics in monkey, 1602
Casts/casting
vascular casts, experimental subretinal neovascularization in monkeys, 481
Cataract(s)
alterations in lens calcium and, 1422
animal model, Philly mouse lens membrane glycoproteins, 1321
calcium oxalate in, 1194
cold, NMR analyses, 99
cortical, light-scattering properties, effect of freezing, 403
diabetic
aldose reductase in, 1250
prevention by sulindac or sorbinil, 1426
extracapsular extraction, effect on corneal thickness and endothelial cell density in dog, 227
formation of, 106
influence of selenium and other trace elements, 417
in gyrate atrophy, 432
hypoglycemic, phase separation of lens cytoplasm and, 522
laser speckle pattern elicited VEPs in, 1400
leucine aminopeptidase and, 1172
Na,K-ATPase in, 1534
nuclear senile, water-insoluble fraction of, loss of free amino groups in, 1181
in RCS rat slit-lamp assessment, 654
selenium-induced, 417
senile, CCRG classification, 424
sugar, 106
reversal of, Sorbinil for, 640
uveitis-associated, model for, 651
x-ray-induced, lens calcium distribution (rabbit), 1188
Catecholamine radioenzyme assay
in epinephrine-induced ptosis, 766
Cathepsin B
in bovine ciliary body and iris, partial purification, 682
Cefazolin
intravitreal, pharmacokinetics in monkey, 1602
Cerebrospinal fluid
coagulation properties, 1616
Ceroid lipofuscinosis
canine, retina and pigment epithelium in, 77
CETAF
see Corneal epithelial cell-derived thymocyte-activating factor
Chandler's syndrome
corneal endothelium in, 603
Chemical irritants
ocular response, species variation, 184
Chick
day-night variation of retinal melatonin content, 294
Children
see Pediatric patient
Cholera toxin
conjunctival immunity, ocular vs intestinal immunization in rats, 1411
Choline
metabolism, and photoreceptor cell degeneration, 288
Cholinergic agents
inhibition of iris dilator muscle, 760
Cholinesterase stain
for study of multiply innervated fibers in rat extraocular muscles, 516
Chorioallantoic membrane (CAM) assay
of antiangiogenic substances, 52
Choroid
depigmentation, regression of cutaneous malignant melanoma and, 1063
Chromatography
proteoglycans of Bruch's membrane, 898
Chromophore exchange
rod outer segment, 1211
Ciliary body
β-adrenergic response, to topical timolol or epinephrine, 718
bovine, cathepsin B in, partial purification, 682
elastic microfibrils, 667
epithelium, human, maintenance in culture, 687
oxytalan fibers, 667
sympathetic innervation, phenylephrine HCl stimulation of, accommodation and, 393
ultrastructure, 667
zonules, 667
Ciliary muscle
see under Muscle(s)
Cilium
rds photoreceptors, 832
Cinematography
high-speed slit-lamp, in tear drainage study, 619
Circadian rhythms
retinal melatonin content in chick, 294
Coagulation
see Blood coagulation
Colchicine
intravitreal
optic atrophy and, 301
retinal toxicity, 301
and pigment granule transport and cone movement, 1
Collagen
in vitreous cavity membranes, 1382
Color vision
acquired defects, ethambutol therapy and, 128
Complement
in aqueous humor, 380
in murine *P. aeruginosa* corneal infection, 237
Complement receptor cells
intravitreal ovalbumin immunization and, 192
Computer planimetry
in corneal re-epithelialization in galactosemic rats, 563
Cone monochromacy
in X-linked incomplete achromatopsia, 451
Cones
see Photoreceptors
Conjunctiva
alkali burn, goblet cell frequency after, 612
blood vessels, horseradish peroxidase study, 725
epithelium
keratin-like proteins in, 577
transdifferentiation to corneal epithelium, 1008
immunity, ocular vs intestinal immunization in rats, 1411

rabbit, synthesis of slow reacting substance-like activity, 1079
surface features, 570
Connective tissue
corneal, synthesis of, in long-term culture, 208
Contact lens
corneal, and aqueous humor hypoxia in cats, 1052
extended wear, corneal swelling and, 218
hydrogel, corneal swelling and, 218
Contrast sensitivity
in ocular hypertension and glaucoma, 1524
spatial frequency, effect of artificial scotoma on, 1131
threshold
rapid determination of, 798
for sine gratings, in amblyopia, 782
visual acuity and, 754
Contrasuppression
in TNP-ACAID, 1339
Cooperative Cataract Research Group (CCRG) photographic procedure
calcium-containing opacities in human lens, 1194
Cornea
β-adrenergic pathway, 1139
changes in responsiveness, 527
β-adrenergic response, to topical timolol or epinephrine, 718
alkali injury, epithelial damage in, 582
culture, glycosaminoglycan synthesis in, 208
edema, extended wear contact lenses and, 218
endothelial cells, in monozygotic and dizygotic twins, 1029
endothelium
cell culture, secondary aqueous humor in, 557
cell density of, effect of phacoemulsification and extracapsular lens extraction on, 227
cell hypertrophy, during postnatal growth of cat cornea, 247
epithelial characteristics of, in Chandler's syndrome, 603
pH and glutathione content following storage in moist chamber and MK medium, 214
topical dexamethasone effect on, 1307
epithelial basement membrane, age-related changes, 1015
epithelium
from conjunctival epithelium, 1008
keratin-like proteins in, 577
preparation of, for DNA and glycogen analysis, 203
fungus infection, antifungal agents for, 1098
infection, cell analysis in, enzymatic disaggregation for, 253
intact, phosphatic metabolites, phosphorus-31 NMR study, 535
neovascularization, angiogenic lymphokines of activated T-cell origin, 1595
P. aeruginosa infection, complement in, 237
re-epithelialization, in galactosemic rats, 563
sensitivity, in herpes simplex keratitis, 596
sensory innervation, surgery and, 1033
serotonergic pathway, 1139
changes in responsiveness, 527
stroma
morphogenesis in rabbit, 543
oxygen permeability of, 645
surface features, 570
surgery, neural regeneration following, 1033
swelling, extended wear contact lenses and, 218
thickness
effect of phacoemulsification and extracapsular lens extraction on, 227
topographical ultrasonic pachometry in rabbit, 1408
toricity, eyelid tension and, 1367
transplantation, tissue preservation, 214
ulceration
Pseudomonas elastase and, 1093
and wound healing proteases, 1358
Corneal epithelial cell-derived thymocyte-activating factor (CETAF)
produced by SIRC cell line, biologic properties, 589
Corneal rings
posterior, in monkeys, 586
Corticosteroids
in Graves' ophthalmopathy, 124
for trachoma, 647
Cortisol metabolism
in trabecular meshwork cell culture from patients with primary open-angle glaucoma, 1413
Cryoextraction
lens, membrane damage and, 1531
Cryptococcus neoformans
endophthalmitis, 368
Crystalline lens
aldose reductase inhibitors in, optical spectroscopy, 1505
calcium-containing opacities, 1194
calcium distribution, in x-ray cataract (rabbit), 1188
cryoextraction, membrane damage and, 1531
cultured, mitosis in, insulin growth factor and epidermal growth factor and, 409
diabetic complications
see also Cataract(s), diabetic
prevention by sulindac or sorbinil, 1426
epithelium, tight junctions in, freeze-fracture and protein tracer studies, 396
fluorophor production (mouse), 1157
H_2O_2 detoxification, inhibition of glutathione reductase and, 113
leucine aminopeptidase in, localization by immunofluorescence and activity assay, 1172
light microscopy, Procion dyes for, 1167
membrane glycoproteins (Philly mouse), 1321
Na,K-ATPase in, 1534
nuclear zone fine structure, preservation of, fixation technique for, 1311
phase separation of cytoplasm, in hypoglycemic cataract, 522
plasma membrane fractions, biochemical and structural characterization, 1496
protein synthesis, calcium and, 1422
proteins
cold cataract and, 99
postsynthetic modifications, 1181
rat, macrophage-mediated damage in culture, 651
spherical aberration, age and (rat), 1162
Crystallins
and cold cataract, 99
Culture
ciliary body epithelium, of human, 687
co-cultivation, retinoblastoma with fibroblasts, iris pigment epithelium, and RPE, 943
cornea, glycosaminoglycan synthesis in, 208
corneal endothelial cell, secondary aqueous humor in, 557
corneal epithelial cells, β-adrenergic and serotonergic responsiveness, 1139
eosinophil-ascarid interaction, 1346
lens, low glucose media, cytoplasmic phase separation in, 522
mitosis in, insulin growth factor and epidermal growth factor and, 409
rat lens, macrophage-mediated damage, 651
retina, vascular endothelial cells and pericytes, differential growth characteristics, 470
retinal capillary pericytes and endothelial cells, aldose reductase activity, 1250

retinal pigment epithelial cell, vitamin A metabolism, 1227
tear gland, protein in, 623
trabecular meshwork cells, from patients with open-angle glaucoma, cortisol metabolism in, 1413
Cyclic adenosine monophosphate (cAMP)
see Adenosine monophosphate, cyclic (cAMP)
Cyclic nucleotides
retinal
iodoacetic acid effect on, 1236
in rds mice, 832
Cyclooxygenase
and synthesis of slow reacting substance-like activity in rabbit conjunctiva and anterior uvea, 1079
Cysteine
zonular, 119
Cytochalasins
and pigment granule transport and cone movement, 1
Cytochemistry
conjunctiva, 570
cornea, 570
Cytosine arabinoside
ocular penetration, subconjunctival vs intravenous administration, 1607
ocular toxicity, subconjunctival vs intravenous administration, 1607

D

Dark adaptation
endogenous circadian retinomotor movements (neon tetra), 1203
Dark focus
time course and variability, 1528
3-Dehydroretinol
goldfish photoreceptor utilization, 1324
Densitometry
foveal, in retinitis pigmentosa, 1123
Dexamethasone
and extracellular matrix components in outflow pathway of rabbit eye, 704
in vitro inhibition of prostaglandin synthesis by human trabecular cells, 1541
and intraocular pressure, nuclear translocation assay, 147
topical, effect on corneal endothelial permeability and aqueous humor flow, 1307
Diabetes mellitus
animal model, capillary basement membrane thickening, 1519
blood-ocular barrier, vitreous fluorophotometric study, 57
retinal oxygen autoregulation in, 985
Dibutyryl cAMP
and light-induced photoreceptor shedding, 1328
Diffraction theory, 66
Disparity modulation
in clinical testing, stereoscopic loss and, 1572
DNA
in corneal epithelium, preparation methods for analysis, 203
Docosahexaenoic acid
in light-induced retinal degeneration, 1433
Dopamine
in newborn human retina, 893
turnover and metabolism, in retina, effect of light on, 384
Doppler velocimetry
laser, *see* Laser Doppler velocimetry

E

Eccentric gaze
and pursuit eye movements, 1108
Edema
see under specific organ(s); specific type
Elastic microfibrils
ciliary body, 667
protein of, 119
Electrical field stimulation
cholinergic inhibitory response in bovine iris dilator muscle, 760
Electrodes
for pattern electroretinogram, 1514
Electron microscopy
age-related changes in human corneal epithelial basement membrane, 1015
blood-aqueous barrier of chicken eye, 326
blood-retinal barrier permeability in phototoxic retinopathy, 962
ciliary body, 667
co-cultivation of retinoblastoma with fibroblasts, iris pigment epithelium, and RPE, 943
conjunctival and episcleral blood vessels, 725
conjunctival surface, 570
corneal endothelium in Chandler's syndrome, 603
corneal surface, 570
distribution of ^{35}S-sulfate and ^{3}H-glucosamine in angular region of hamster, 697
in epinephrine-induced ptosis, 766
human ciliary body epithelium in culture, 687
leucine-enkephalin-like immunoreactivity in chicken retina, 879
membranes removed during open-sky vitrectomy, 1382
morphogenesis of rabbit corneal stroma, 543
nonfluorescent dye staining of primate blue cones, 1449
opsin in frog photoreceptor plasma membrane, 868
photoreceptors, in retinal degeneration, slow (rds), 832
in retinal detachment
outer nuclear and outer plexiform layers, 927
pigment epithelial-photoreceptor interface, 906
in retinitis pigmentosa, 458
S-100 protein in Müller cells, 980
scanning, galactosemic rat cornea, 563
tight junctions in lens epithelia of human and frog, 396
transmission, eosinophil-ascarid interaction in vitro, 1346
vascular casts of experimental subretinal neovascularization in monkeys, 481
vesicular transport mechanism in retinal vessels, 1465
Electro-oculogram (EOG)
of cat, effects of hypoxia and hypercapnia, 37
Electro-oculography (EOG)
eccentric gaze and pursuit, 1108
pursuit eye movements on an OKN background, 1115
Electrophoresis
gel, proteins of retinal pigment epithelium, 803
proteoglycans of Bruch's membrane, 898
SDS polyacrylamide gel
of keratin-like proteins in ocular surface epithelium, 577
tear fluid proteins, 623
zonular proteins, 119
Electroretinogram (ERG)
in canine ceroid lipofuscinosis, 77
of cat, effects of hypoxia and hypercapnia, 37
flash, in glaucoma, 749
pattern (PERG)
cautionary note in recording, 796
effect of different electrodes, 1514
pattern reversal, in glaucoma, 749
photopic, in congenital stationary night blindness, 442
in retinal degeneration, 72
in retinitis pigmentosa, 458

in rod outer segment shedding, 277
in uveal depigmentation, 1063
Endophthalmitis
bacterial, *N*-formimidoyl thienamycin (MK-787) for, 1147
hematogenous, due to *Cryptococcus neoformans*, 368
Energy dispersive x-ray analysis (EDXA)
calcium-containing opacities in human lens, 1194
Enkephalin
in chicken retina, 879
Enzymatic disaggregation
for cell analysis in corneal disorders, 253
Eosinophils
in ocular ascarid infection, 1346
Epidermal growth factor
and mitotic activity of cultured lens, 409
Epinephrine
and β-adrenergic pathway in cornea, 527
and aqueous humor formation, thymoxamine effect on, 165
and 6-hydroxydopamine iontophoresis, HSV-1 ocular shedding and, 1588
topical, and β-adrenergic responsiveness of cornea and iris-ciliary body, 718
ptosis and, 766
Epinephrine iontophoresis
and HSV-1 ocular shedding, 243
Episclera
blood vessels, horseradish peroxidase study, 725
Episcleral venous pressure
invasive vs noninvasive measurement, 1417
Escherichia coli endotoxin
and nystagmus blockage syndrome, 1580
systemic injection, ocular inflammation and, 196
Esotropia
visual evoked responses in, 1390
Ethambutol
color vision defects and, 128
N-Ethyl maleimide
perfusion of monkey eye, aqueous outflow facility following, 710
Exotropia
visual evoked responses in, 1390
Extracellular matrix
effect on corneal endothelial cell proliferation in presence of secondary aqueous humor, 557
Extraocular muscles
see under Muscle(s)
Eye movements
pursuit
eccentric gaze and, 1108
effects of optokinetic background on, 1115
Eyelids
tension, and corneal toricity, 1367

F

Fc receptor cells
intravitreal ovalbumin immunization and, 192
Feline sarcoma virus
subcutaneous injection of, anterior uveitis and, 1055
Fibrin
and corneal ulceration, 1358
in vitreous cavity membranes, 1382
Fibroblasts
human, co-cultivation with retinoblastoma, 943
Fibronectin
and corneal ulceration, 1358
Flat mounts
retinal tissue, for leucine-enkephalin-like immunoreactivity study, 879
Flicker sensitivity
in ocular hypertension and glaucoma, 1524
Flucytosine
in *Candida albicans* keratitis, 1098
Fluorescein angiography
determination of intraocular blood flow from, 354
iris, normal pattern in monkey, 790
pharmacokinetics, in vitreous fluorophotometry, 1374
in retinitis pigmentosa, 1123
Fluorescence spectroscopy
aldose reductase inhibitors in lens, 1505
Fluorescent markers
blood-retinal barrier permeability, in phototoxic retinopathy, 972
Fluorometholone
and intraocular pressure, nuclear translocation assay, 147
Fluorophor
metabolic production in mouse lens, 1157
Fluorophotometry
thymoxamine effect on aqueous humor formation in epinephrine-treated normal eye, 165
vitreous, *see* Vitreous fluorophotometry
fluorescein pharmacokinetics, 1374
Forced-choice preferential looking technique
to measure visual acuity in infants, 519
N-Formimidoyl thienamycin (MK-787)
intraocular penetration, 1147
Free amino groups
loss of, in water-insoluble protein fraction of nuclear cataracts, 1181
Freeze-fracture study
blood-aqueous barrier of chicken eye, 326
tight junctions in lens epithelia of human and frog, 396
Freeze-thaw cycle
effect on optical properties of cortical cataracts, 403
Fundus
depigmentation, cutaneous malignant melanoma regression and, 1063
measurement, interference fringe scale for, 169
Fungus infection
corneal, antifungal agents for, 1098

G

GABA
see γ-Aminobutyric acid
Galactose
and retinal capillary basement membrane thickening, 1519
Galactosemia
cornea in, 563
Ganglion cells
human fetal retinas, 1316
Gap junctions
plasma membrane of vertebrate lens fiber cells, 1496
Gaze
eccentric, and pursuit eye movements, 1108
Geniculate nucleus
lateral, *see* Lateral geniculate nucleus
Gentamicin
intravitreal, pharmacokinetics in monkey, 1602
penetration into vitreous humor, 637
"Giant vacuoles"
in Schlemm's canal, topical timolol and, 339

Glaucoma
animal model, laser energy levels for trabecular meshwork damage in primate eye, 1305
aqueous outflow and, Schlemm's canal in, 320
endogenous production of prostaglandins by trabecular cells and, 1541
flicker threshold and pattern VEP latency in, 1524
glucocorticoid target cells in aqueous outflow pathway, 1612
open-angle, trabecular meshwork cell culture, cortisol metabolism in, 1413
pattern-reversal ERG in, 749
prostaglandins for, 312
visual evoked potential in, 175
Glucocorticoid receptor
nuclear translocation, in iris-ciliary body, 147
Glucocorticoids
target cells, in human outflow pathway, 1612
^{3}H-Glucosamine
distribution in angular aqueous plexus of hamster, 697
Glutamate
in newborn human retina, 893
and vitreous potassium concentration, 631
Glutaraldehyde
for fixation of neonatal mouse lens, 1311
Glutathione
in corneal endothelium stored in moist chamber and in MK medium, 214
for fixation of neonatal mouse lens, 1311
in trabecular meshwork, relation to aqueous humor outflow facility, 1283
Glutathione reductase
inhibition of, and H_2O_2 detoxification in lens, 113
Glycine
in newborn human retina, 893
and vitreous potassium concentration, 631
Glycogen
in corneal epithelium, preparation methods for analysis, 203
Glycolysis
retinal, aldose reductase in, 1250
Glycoprotein
in vitro synthesis by aqueous outflow pathway cells, 1546
lens membrane (Philly mouse), 1321
zonular, 119
Glycosaminoglycan
synthesis, in long-term cornea culture, 208
Glycosaminoglycans
in aqueous outflow pathway, dexamethasone effect on, 704
in Bruch's membrane, 898
in vitro synthesis by aqueous outflow pathway cells, 1546
Goblet cell
conjunctival, following alkali injury, 612
Gout
colchicine for, retinal toxicity, 301
Graves' ophthalmopathy
HLA-BW35 and, 124
Guanosine monophosphate, cyclic (cGMP)
retinal, iodoacetic acid effect on, 1236
Guinea pigs
ocular inflammation studies in, contraindications, 184
Gyrate atrophy
cataract in, 432

H

Hemicholinium-3
and retinal choline metabolism, photoreceptor cell degeneration and, 288
Heparin sulfate
in Bruch's membrane, 898
Heredity
corneal endothelial cell density and morphology and, 1029
Herpes simplex virus
keratitis, corneal sensitivity and substance Pin, 596
type 1
induced ocular shedding, animal model, 1588
intracerebral injection, ocular lesions following, 1070
latency, thymidine kinase and, 599
in neural and ocular tissues, following epinephrine iontophoresis to cornea, 243
neurovirulence, thymidine kinase and, 599
reactivation, 1588
type 2, and in vitro malignant transformation of hamster retina, 1489
Hexose-monophosphate shunt
in H_2O_2 detoxification by lens, 113
in trabecular meshwork, 1283
Histofluorescence microscopy
in phototoxic retinopathy, permeability of blood-retinal barriers, 972
HLA antigens
HLA-BW35, in Graves' ophthalmopathy, 124
Horner's syndrome
Horseradish peroxidase study
alterations of blood-ocular barrier in streptozotocin-induced hyperglycemia (rats), 1259
of blood-aqueous barrier in chicken, 326
blood-retinal barrier permeability in phototoxic retinopathy, 962
conjunctival and episcleral blood vessels, 725
inhibition of retrograde axoplasmic transport in rat optic nerve by increased IOP, 1552
nerve fiber layer
macaque monkey retina, 85
owl monkey retina, 265
tight junctions in lens epithelia of human and frog, 396
unidirectional vesicular transport mechanism in retinal vessels, 1465
uveal compartmentalization in hamster, 1288
Human(s)
anisometropic amblyopia, lateral geniculate nucleus in, 788
binocular summation in infants, 1103
ciliary body epithelium, maintenance in culture, 687
corneal epithelial basement membrane, age-related changes, 1015
corneal stroma, oxygen permeability of, 645
effect of freezing on cortical cataracts, 403
giant vacuoles in lining endothelium of Schlemm's canal after topical timolol, 339
glaucoma, pattern-reversal ERG in, 749
intraocular blood flow from analysis of angiograms, 354
neurotransmitter properties of newborn retina, 893
retinal circulation, light-dark effects, laser Doppler velocimetry in, 737
retinal development in fetus, 857
retinal pigment epithelium, proteins in, 803
role of Schlemm's canal in aqueous outflow, 320
senile cataractous changes in, CCRG classification, 424
thymoxamine effect on aqueous humor formation in epinephrine-treated normal eye, 165
tight junctions in lens epithelia, freeze-fracture and protein tracer studies, 396
vitreous, penetration of gentamicin into, 637
Hydrogel lenses
see under Contact lenses

Hydrogen peroxide
in aqueous humor, glutathione and, 1283
in lens, detoxification of, inhibition of glutathione reductase and, 113
6-Hydroxydopamine
iontophoresis, and topical epinephrine, to induce HSV-1 ocular shedding, 1588
ptosis and, 766
Hypercapnia
and light peak and ERG of cat, 37
Hyperglycemia
and retinal oxygen autoregulation, 985
streptozotocin-induced (rat), blood-ocular barrier alterations in, 1259
Hyperopia
and aniseikonia, 507
Hyperoxia
iris circulation and, 741
Hypertension
see Ocular hypertension
Hypotony
intracarotid mannitol infusion and, 153
Hypoxia
aqueous humor, in cats, corneal contact lens and, 1052
iris circulation and, 741
and light peak and ERG of cat, 37
Hysteresis
accommodative, 513

I

Immune system
anterior chamber relation to, 1086
Immunization
intravitreal, Fc and complement receptor lymphocytes and, 192
Immunocytochemistry
electron microscopic, S-100 protein in Müller cells, 980
light microscopic, S-100 protein in Müller cells, 976
opsin distribution in plasma membrane of frog photoreceptors, 868
Immunoelectrophoresis
tear fluid proteins, 623
Immunofluorescence study
localization of leucine aminopeptidase in hog lens, 1172
Immunofluorescent microscopy
actin in normal and dystrophic pigment epithelial cells during phagocytosis of rod outer segments, 821
defective phagocytosis of shed outer segment discs, 812
Immunoglobulins
secretory IgA, *see* Secretory IgA
in tear fluid, 623
Immunohistochemistry
aldose reductase localization in human retinal mural cells, 1516
leucine-enkephalin-like immunoreactivity in chicken retina, 879
pancreatic polypeptidelike immunoreactive nerves in guinea pig eye, 1620
Immunology
TNP-ACAID, 1339
Immunoperoxidase technique
for S-100 protein in intraocular melanoma, 1153
Indomethacin
in ocular response to nitrogen mustard, 175
Infants
see Pediatric patients
Inflammation
corneal, angiogenesis in, 1595
nitrogen mustard-induced, 175
ocular
comparative study of anti-inflammatory agents, 1143
lymphokines in, 361
systemic injection of bacterial endotoxin and, 196
Inflammatory changes
of pineal gland, in experimental autoimmune uveitis, 1333
Innervation
extraocular muscles, morphologic and electrophysiologic studies, 516
Insulin growth factor
and mitotic activity of cultured lens, 409
Interference fringe scale
for absolute ocular fundus measurement, 169
Intraocular muscles
increased, and inhibition of retrograde axoplasmic transport in optic nerve, 1552
motor function, effects of substance P and vasoactive intestinal peptide on, 1566
Intraocular pressure (IOP)
aqueous outflow and, Schlemm's canal in, 320
effect of repeated anterior chamber perfusion on, 159
elevated, retinal nerve fiber function in, 347
elevation, laser-induced, 1305
nitrogen mustard effect on, 175
prostaglandins and, 312, 376
relation to intraocular blood flow, fluorescein angiographic analysis, 354
steroids and, nuclear translocation assay, 147
in water-loaded rabbit, effect of timolol stereoisomers on, 1276
Inverted phase-contrast microscopy
human ciliary body epithelium in culture, 687
Iodoacetamide
perfusion of monkey eye, aqueous outflow facility following, 710
Iodoacetic acid
retinal effects (ground squirrel), 1236
Iontophoresis
6-hydroxydopamine, and topical epinephrine, HSV-1 ocular shedding and, 1588
Iris
blood flow, in hypoxia and hyperoxia, 741
bovine, cathepsin B in, partial purification, 682
depigmentation, regression of cutaneous malignant melanoma and, 1063
dilator muscle, cholinergic inhibition of, 760
fluorescein angiography, normal pattern in monkey, 790
pigment epithelium, co-cultivation with retinoblastoma, 943
wound repair, 1616
Iris-ciliary body
glucocorticoid receptor in, nuclear translocation of, 147
Iritis
due to *Cryptococcus neoformans*, 368
Irradiation
blood-aqueous barrier disruption and, capsaicin in, 744

K

Keratan sulfate
see Glycosaminoglycan
Keratectomy
neural regeneration following, 1033
Keratin
in ocular surface epithelium, 577

Keratitis
Candida albicans, antifungal agents for, 1098
candidal, K-582 for, 1626
herpes simplex
corneal sensitivity and substance Pin, 596
in mouse, 599
pseudomonal, management, 1093
Keratotomy
neural regeneration following, 1033
Ketoconazole
in *Candida albicans* keratitis, 1098
6-Keto-prostaglandin $F_{1\alpha}$
in secondary aqueous humor, 557
K-582
for candidal keratitis, 1626

L

Lacrimal gland
tear fluid protein and, 623
Lactoferrin
in tear fluid, 623
Lamina cribrosa
anatomy, and pressure-induced fast axonal transport abnormalities, 343
Laser Doppler velocimetry
in determination of retinal blood flow
during pure oxygen breathing, 47
response to light and dark, 136
in retinal blood flow study, 737
Laser speckle pattern
VEPs elicited by, 1400
Laser therapy
argon laser, acceptable energy levels, 1305
Lateral geniculate nucleus
in anisometropic amblyopia, 788
Lens
see Crystalline lens
Letters to Editor, 658, 1440, 1441, 1442, 1443
Leucine aminopeptidase
activity assay, for localization in hog lens, 1172
Leucine-enkephalin
retinal, ultrastructure, 879
Leukocytes
in corneal infection, analysis of, 253
Light
and ascorbate levels in retina, 862
dopamine turnover and metabolism and, in rabbit retina, 384
and myeloid bodies in mammalian retinal pigment epithelium, 388
and photoreceptor disc shedding, 844
in human fetus, 857
retinal damage from, action spectrum of, 285
and retinomotor pigment migration in Teleost RPE, 1
and Vernier acuity, 66
Light damage
retina, lipid peroxidation in, 1433
Light microscopy
ciliary body, 667
conjunctival and episcleral blood vessels, 725
frog lens, Procion dyes for, 1167
giant vacuoles in lining endothelium of human Schlemm's canal after topical timolol, 339
morphogenesis of rabbit corneal stroma, 543
nonfluorescent dye staining of primate blue cones, 1449
in retinal detachment
outer nuclear and outer plexiform layers, 927
pigment epithelial-photoreceptor interface, 906
S-100 protein in Müller cells, 976
Light peak
of cat eye, hypoxia and hypercapnia and, 37
Light-scattering
in cortical cataracts, effect of freezing, 403
Lipid conjugated dienes
in light-induced retinal degeneration, 1433
Lipid peroxidation
in light-induced retinal degeneration, 1433
Lipoxygenase products
synthesis in rabbit conjunctiva and anterior uvea, 1079
Liquid crystals
in vitreous, 133
Lucifer yellow
for study of multiply innervated fibers in rat extraocular muscles, 516
Luminance of stimulus
and visual acuity testing in infants, 519
Lymphatics
conjunctival, in aqueous outflow, 725
Lymphokines
angiogenic, in immunogenic uveitis, 361
Lysozyme
in tear fluid, 623

M

Macrophages
and uveitis-associated cataracts, 651
Macular photostress test
electrophysiologic investigation of, 437
Maculopathy
macular photostress test, 437
Maddox hierarchy
binocular vergence, 772
Magnesium
and photoreceptor disc shedding, 1456
Mannitol
intracarotid infusion, ocular effects, 153
Maroteaux-Lamy syndrome
see Mucopolysaccharidosis VI
Medrysone
and intraocular pressure, nuclear translocation assay, 147
α-Melanocyte-stimulating hormone
blood-aqueous barrier disruption and, capsaicin in, 744
Melanocytes
uveal, destruction of, cutaneous malignant melanoma regression and, 1063
Melanoma, malignant
cutaneous, regression of, uveitis and, 1063
intraocular, S-100 protein in, 1153
Melanosomes
retinal pigment epithelium, endogenous circadian retinomotor movements (neon tetra), 1203
Melatonin
retinal, in chick, day-night variation in, 294
Membranes
inhibition of Pseudomonas elastase, 1093
vitreous cavity, characterization of, 1382
2-Mercaptoacetyl-L-phenylalanyl-L-leucine (HSAc-Phe-Leu)
^{35}S-Methionine study
cataractogenesis, 106

Method of adjustment
for determination of threshold contrast sensitivity, 798
Method of increasing contrast
for determination of threshold contrast sensitivity, 798
Methylmethacrylate vascular casting
in study of experimental subretinal neovascularization in monkeys, 481
Miconazole
in *Candida albicans* keratitis, 1098
Microangiopathy
diabetic, aldose reductase in, 1516
Microcannulation
venous, for episcleral venous pressure measurement, 1417
Micropolarographic system
in assessing aerobic response of cornea to alkali, 582
Microscopy
dark-field, eosinophil-ascarid interaction in vitro, 1346
Microtubules
in pigment granule transport and cone movement, 1
Miosis
nitrogen mustard-induced, 175
Mitosis
in cultured lens, insulin growth factor and epidermal growth factor and, 409
MK medium
for corneal preservation, 214
Monoclonal antibody
anti-neuroblastoma, reaction of ocular tumors to, 1150
Mucopolysaccharidosis VI
in cats, ocular and pigment epithelial pathology, 991
Mucosal immunity
in conjunctival immunity, 1411
Müller cells
S-100 protein in
electron microscopic immunocytochemistry, 980
light microscopic immunocytochemistry, 976
Mural cell
retinal, aldose reductase in, 1516
Muscle(s)
ciliary, cholinergic neurotransmission, vasoactive intestinal peptide and, 250
extraocular, multiply innervated fibers in, morphologic and electrophysiologic identification, 516
intraocular, motor function, effects of substance P and vasoactive intestinal peptide on, 1566
iris dilator, cholinergic inhibition of, 760
Myeloid bodies
in mammalian retinal pigment epithelium, 388
Myopia
and aniseikonia, 507
axial, accommodative hysteresis and, 513
and congenital stationary night blindness, photopic ERG in, 442
night, time course and variability, 1528
Myroridin K
see K-582

N

Na,K-ATPase
in lens, 1534
Natamycin
in *Candida albicans* keratitis, 1098
Neovascularization
subretinal, in monkey, methylmethacrylate vascular cast study, 481
vitreous inhibition of, 52
Nerve fiber layer
macaque monkeys, retinotopy, 85
owl monkey, retinotopy, 265
Neural development
and aniseikonia, 507
Neural regeneration
following corneal surgery, 1033
Neural tissue
HSV-1 in, following epinephrine iontophoresis to cornea, 243
Neuropathy
diabetic, prevention by sulindac or sorbinil, 1426
optic, *see* Optic neuropathy
Neurotransmitters
in newborn human retina, 893
Night blindness
congenital stationary, with myopia, photopic ERG in, 442
Night myopia
time course and variability, 1528
Nipecotic acid
intraocular injections, and retinal uptake of ^{3}H-GABA, 886
Nitrogen mustard
ocular response, species variation, 175, 184
NMR study
cold cataract, 99
phosphorus-31, of phosphatic metabolites in intact cornea, 535
Nuclear magnetic resonance
see NMR study
Nuclear translocation assay
for ocular glucocorticoid activity, 147
optokinetic, pursuit eye movements in, 1115
Nystagmus
congenital, 1580
manifest latent, 1580
Nystagmus blockage syndrome (NBS), 1580

electron microscopic immunocytochemistry, 980
light microscopic immunocytochemistry, 976
tyrosine hydroxylase activity, effect of light on, 384
vascular cells, in vitro growth characteristics, 470
vessels, unidirectional vesicular transport mechanism, 1465

Retinal detachment
and subretinal fluid dynamics, 1475

Retinal pigment epithelium (RPE)
ascorbate in, 862
in canine ceroid lipofuscinosis, ultrastructural abnormalities, 77
of cat, effects of hypoxia and hypercapnia on, 37
cell culture, vitamin A metabolism, 1227
co-cultivation with retinoblastoma, 943
in feline mucopolysaccharidosis VI, 991
mammalian, myeloid bodies in, 388
melanosomes, endogenous circadian retinomotor movements (neon tetra), 1203
permeability defects, in streptozotocin-induced hyperglycemia (rat), 1259
phagocytosis
dibutyryl cAMP and, 1328
inhibition by deletion of extracellular divalent cations, 1456
-photoreceptor interface, in retinal detachment, 906
proteins of, 803
retinomotor pigment migration
actin and microtubules in, 1
cyclic adenosine monophosphate and, 16
and subretinal fluid dynamics, 1475

Retinitis
herpes simplex virus type I, 1070

Retinitis pigmentosa
clinical-ultrastructural study, 458
foveal densitometry in, 1123
visual acuity and cone spatial density, 1511

Retinoblastoma
co-cultivation with fibroblasts, iris pigment epithelium, and RPE, 943
fibroblasts from, x-ray sensitivity, 958
hereditary, x-ray sensitivity of fibroblasts from, 958
sporadic, x-ray sensitivity of fibroblasts from, 958

Retinol
goldfish photoreceptor utilization, 1324

^{3}H-Retinol
in evaluation of rhodopsin chromophore exchange, 1211

Retinol binding protein (RBP)
in evaluation of rhodopsin chromophore exchange, 1211

Retinomotor movements
dibutyryl cAMP and, 1328
endogenous circadian, in neon tetra, 1203

Retinopathy
diabetic
aldose reductase in, 1250, 1516
galactose and, 1519
in vitro retinal capillary cell study, 470
vitreous fluorophotometry, 57
phototoxic
blood-retinal barrier permeability in, ultrastructural study, 962
vitreous fluorophotometry and histofluorescence microscopy in, 972

Retinotopy
nerve fiber layer
macaque monkey, 85
owl monkey, 265

Rhodopsin
chromophore exchange, 1211
Porphyropsin goldfish, 0000

Rods and cones
see Photoreceptors

Rubeosis iridis
hypoxia and, 741

S

S-100 protein
in intraocular melanoma, 1153
in Müller cells
electron microscopic immunocytochemistry, 980
light microscopic immunocytochemistry, 976

Salbutamol
and aqueous humor formation in monkey, 1269

S-antigen
retinal specific, 1333

Scanning electron microscopy (SEM)
calcium-containing opacities in human lens, 1194

Schlemm's canal
in aqueous outflow, 320
lining endothelium, giant vacuoles in, topical timolol and, 339

Scotoma
artificial, and spatial contrast sensitivity, 1131

Secretory IgA
in conjunctival immunity, 1411

Selenite
and cataractogenesis in rat, 417

Selenium
and cataractogenesis in rat, 417

Serotonin
in cornea, 527, 1139

Shigella endotoxin
systemic injection, ocular inflammation and, 196

SIRC cell line
CETAF from, biologic properties, 589

Slow reacting substance-like activity
synthesis in rabbit conjunctiva and anterior uvea, 1079

Sodium iodate
and membrane barrier properties of RPE, 1475
Sodium nitroprusside infusion
in study of retinal nerve fiber function at acute IOP elevation, 347
Sodium-potassium ATPase
in lens, 1534
Somatomedins
and mitotic activity of cultured lens, 409
Sorbinil
see Aldose reductase inhibitors
for galactose-induced retinal capillary basement membrane thickening, 1519
in lens, fluorescence spectroscopy, 1505
for prevention of diabetic complications in lens and nerve, 1426
Sorbitol
in diabetic cataract, 1250
in diabetic cataract and neuropathy, 1426
Specular microscopy
corneal endothelial cells of monozygotic and dizygotic twins, 1029
epithelial characteristics of corneal endothelium in Chandler's syndrome, 603
and posterior corneal rings, in monkeys, 586
Spherical aberration
crystalline lens (rat), age and, 1162
Spinules
formation of, brief light exposure and, 24
Standing potential of eye
in canine ceroid lipofuscinosis, 77
Staphylococcus aureus
corneal infection, cell analysis in, 253
Stereograms
dynamic random-dot, in monkeys with optical dissociation, 491
Stereopsis
in amblyopia, occlusion therapy and, 778
binocular cortical neurons in, 491
dynamic, in strabismus, spatial characteristics, 1572
in human infants, 1103
static, in strabismus, spatial characteristics, 1572
Strabismus
amblyopia in, contrast thresholds for sine gratings, 782
in cats reared with unequal alternating monocular exposure and then given binocular exposure, 496
static and dynamic stereoacuity in, 1572
visual evoked responses in (cats), 1390
Subretinal fluid
dynamics, retinal pigment epithelial damage and, 1475
Substance P
effect on motor function of bovine intraocular muscles, 1566
in herpes simplex keratitis, 596
^{35}S-Sulfate
distribution in angular aqueous plexus of hamster, 697
Sulfhydryl reagents
ocular perfusion with, aqueous outflow facility following, 710
Sulindac
for prevention of diabetic complications in lens and nerve, 1426
Suppression
of less experienced eye in cats reared with unequal alternating monocular exposure, 496
Suppressor T-cells
in TNP-ACAID, 1339
Sympathectomy
chemical, 766
Sympathetic innervation
phenylephrine HCl stimulation of, accommodation and, 393

T

T cell
activated, angiogenic lymphokines of, 1595
suppressor, in TNP-ACAID, 1339
Tear mucin
and conjunctival goblet cell frequency, 612
Tears
drainage of, 619
osmotic characteristics, 1624
proteins in, origin and biosynthesis, 623
Tensiometer
for eyelid tension, 1367
Thymidine kinase
and neurovirulence of HSV-I in mouse, 599
Thymocyte-activating factor
see Corneal epithelial cell-derived thymocyte activating factor (CETAF)
Thymoxamine
and aqueous humor formation, in epinephrine-treated normal eye, 165
Thyroid eye disease
Graves' ophthalmopathy, 124
Thyrotoxicosis
ophthalmopathy in, 124
Tight junctions
see Zonulae occludentes
Timolol
and aqueous humor formation in monkey, 1269
Timolol maleate
morphologic effect on outflow apparatus, 339
stereoisomers, effect on cAMP synthesis and IOP in water-loaded rabbits, 1276
topical, and β-adrenergic responsiveness of cornea and iris-ciliary body, 718
TNP-ACAID
in study of ocular immune regulation, 1086
suppressor networks in, 1339
Topographical ultrasonic pachometry
corneal thickness profiles in rabbits, 1408
Toricity
corneal, eyelid tension and, 1367
Toxicology
cytosine arabinoside, 1607
Toxocara canis
larvae, in vitro eosinophil interaction with, 1346
Trabecular meshwork
cell culture, from patients with primary open-angle glaucoma, cortisol metabolism in, 1413
glutathione in, relation to aqueous humor outflow facility, 1283
prostaglandin synthesis in, dexamethasone inhibition in vitro, 1541
Trabeculoplasty
argon laser, for glaucoma, acceptable energy levels, 1305
Trace elements
and cataractogenesis in rat, 417
Trachoma
animal model, 647
Transdifferentiation
conjunctival to corneal epithelium, 1008
Tumors
ocular
malignant melanoma, 1153
reaction with anti-neuroblastoma monoclonal antibody, 1150
Twins
corneal endothelial cell study, 1029
Tyrosine hydroxylase
in retina, effect of light on, 384

U

Ulceration
  corneal, and wound healing proteases, 1358
Ultrasound
  topographical ultrasonic pachometry of rabbit cornea, 1408
Ultrastructure
  see Electron microscopy
  nuclear zone of mouse lens, fixation technique for, 1311
  uveal compartmentalization in hamster, 1288
Uvea
  anterior, rabbit, synthesis of slow reacting substance-like activity, 1079
  compact zone, 1288
  posterior compartment, fine structural and tracer studies (hamster), 1288
Uveal tract
  depigmentation, cutaneous malignant melanoma regression and, 1063
Uveitis
  anterior
    aqueous humor complement levels in, 380
    subcutaneous injection of feline sarcoma virus and, 1055
  cataract in, model for, 651
  experimental autoimmune (EAU), pineal gland in (rat), 1333
  immunogenic, lymphokines in, 361
  regression of cutaneous malignant melanoma and, 1063

V

Vascular endothelium
  retinal, in vitro growth characteristics, 470
Vascular system
  conjunctival, horseradish peroxidase study, 725
  episcleral, horseradish peroxidase study, 725
  iris, arteriolar diameters in hypoxia and hyperoxia, 741
  retina
    in phototoxic retinopathy, 962, 972
    response to light and dark, 136
    volume of, laser Doppler velocimetry study, 47
Vasoactive intestinal peptide (VIP)
  and cholinergic neurotransmission in ciliary muscle, 250
  effect on motor function of bovine intraocular muscles, 1566
Venous microcannulation
  see Microcannulation, venous
Vergence
  binocular, response variance, 772
  disparity, in near vergence response, 772
  in near vergence response, 772
Vernier acuity
  stimulus features, 66
Virus infection
  feline sarcoma virus, anterior uveitis and, 1055
Visual acuity
  in amblyopia
    contrast threshold functions, 782
    occlusion therapy and, 778
  and contrast sensitivity, 754
    in amblyopia, 782
    rapid determination of, 798
  in infants, effect of variations in stimulus luminance within photopic range, 519
  in retinitis pigmentosa, 1511
Visual cortex
  monkey, 1436
Visual evoked potential (VEP)
  early peak, 793
  in glaucoma, 175
  laser speckle pattern elicitation, 1400
  in ocular hypertension, 175
  pattern, latency of, in ocular hypertension and glaucoma, 1524
Visual evoked response (VER)
  recovery after macular photostress test, 437
  from strabismic cats, 1390
Visual fields
  of cats reared with unequal alternating monocular exposure and then given binocular exposure, 496
  contrast sensitivity, spatial frequency and, 754
    effect of artificial scotoma on, 1131
  pattern sensitivity (acuity), 754
Visual topography
  monkey, 1436
Vitamin A
  metabolism, in cultured human retinal pigment epithelial cells, 1227
  utilization by photoreceptors (goldfish), 1324
Vitrectomy
  open-sky, membranes removed during, characterization of, 1382
Vitreous
  asteroid bodies, 133
  of cat, oxygen in, 30
  cryptococcal lesion, 368
  inhibition of neovascularization, 52
Vitreous fluorophotometry
  in diabetic retinopathy, 57
  fluorescein pharmacokinetics, 1374
  in phototoxic retinopathy, permeability of blood-retinal barriers, 972
Vitreous humor
  coagulation properties, 1616
  N-formimidoyl thienamide penetration, 1147
  gentamicin penetration into, 637
  potassium concentration, factors affecting, 631

W

Water loading
  and ocular hypertension, effect of timolol stereoisomers on, 1276
Wound healing
  in corneal alkali burns, 1358

X

Xanthine-xanthine oxidase
  and damage to cultured lenses, 651
X-irradiation
  cataract formation (rabbit), lens calcium distribution, 1188
X-linked incomplete achromatopsia
X-rays
  sensitivity of fibroblasts from retinoblastoma patients, 958

Z

Zonulae occludentes
  in lens epithelia of human and frog, 396
Zonules
  see Ocular zonules
